

# Finnish Digital Agency – towards a smoothly functioning Finland

@DVVfi

@suomifi

@jani\_ruuskanen

Mr. Jani Ruuskanen  
Chief Senior Specialist  
[jani.ruuskanen@dvv.fi](mailto:jani.ruuskanen@dvv.fi)

# Digital and Population Data Services Agency (aka Finnish Digital Agency)

## Launched 1.1.2020

Population Register Centre and the  
District Register Offices (9) merged to form one agency.

<https://dvv.fi>

A total of 36 offices.  
~1000 employees.

FY2021 budget 101 Million Euros  
+ separate project-based funding.

<https://dvv.fi>

Towards  
a smoothly  
functioning  
Finland

## Mission

**To promote** the digitalisation of society.

**To ensure** the availability of data.

**To offer** services for customers' life events.

## Values

We operate courageously by reforming, supporting and appreciating.

We create trust and care about the future.

## Future trends

**Digitalisation** is everywhere

**Problems** will become more complex

**The relationship between the environment and the economy** is changing

**The population** will age and become more diverse

**The security environment** will become more complex

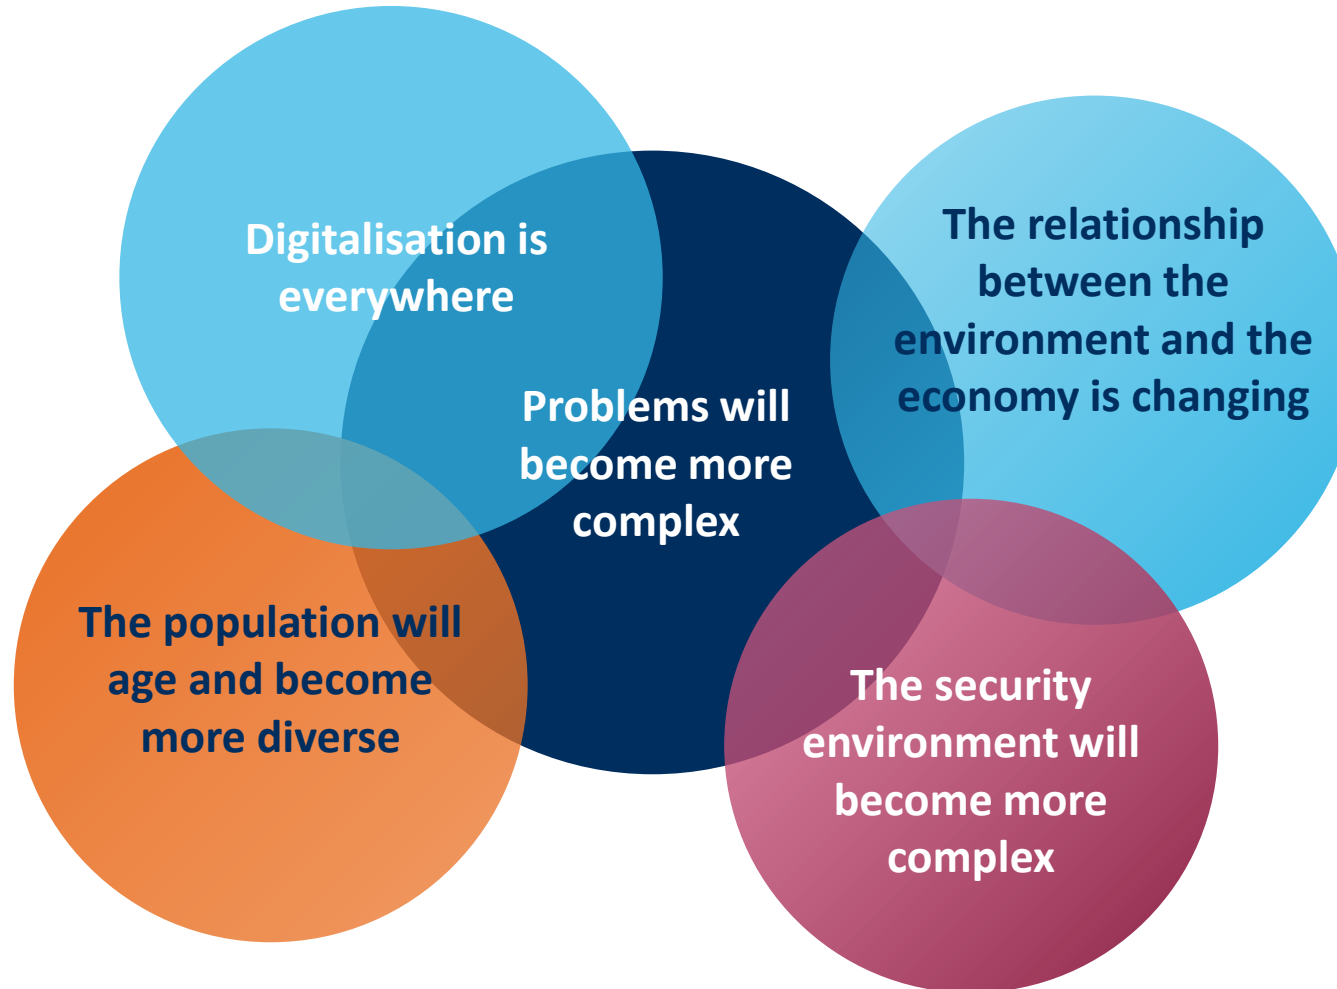

# Future trends – the key trends affecting our operations

## Digitalisation is everywhere

The increasing presence of technology makes it possible to better meet people's needs. When taking advantage of technology, the opportunity for humane and safe interaction must be secured for everyone.

## Problems will become more complex

Because of the complex, intertwined challenges, there is a need to learn to think in a new way, work together with different actors to address systemic phenomena, and influence the different interactive relationships between phenomena by experimenting and learning.

## The relationship between the environment and the economy is changing

Changes in ideas, lifestyles and consumption habits will increase the importance of ecology and sustainability. Climate change forces people to make choices and creates new opportunities.

## The security environment will become more complex

Global polarisation and uncertainty in international politics create hybrid threats. Reliance on technology increases the extent of threats and damages and their impacts on individuals, communities and society.

## The population will age and become more diverse

The sustainability gap in the public sector resulting from the unbalanced dependency ratio makes it more difficult to maintain the welfare society. New competences and new ways of working are needed to solve the mismatch.

## The planet of local solutions

The planet of local solutions is a society based on trust where services are nonadjacent but close to people

## The Finland of platforms

Finland is a society based on trust in which the actors engage in goal-oriented cooperation

## The wilderness of lonely individuals

In the wilderness of lonely individuals, the renewal of services depends on the competence of strong local actors

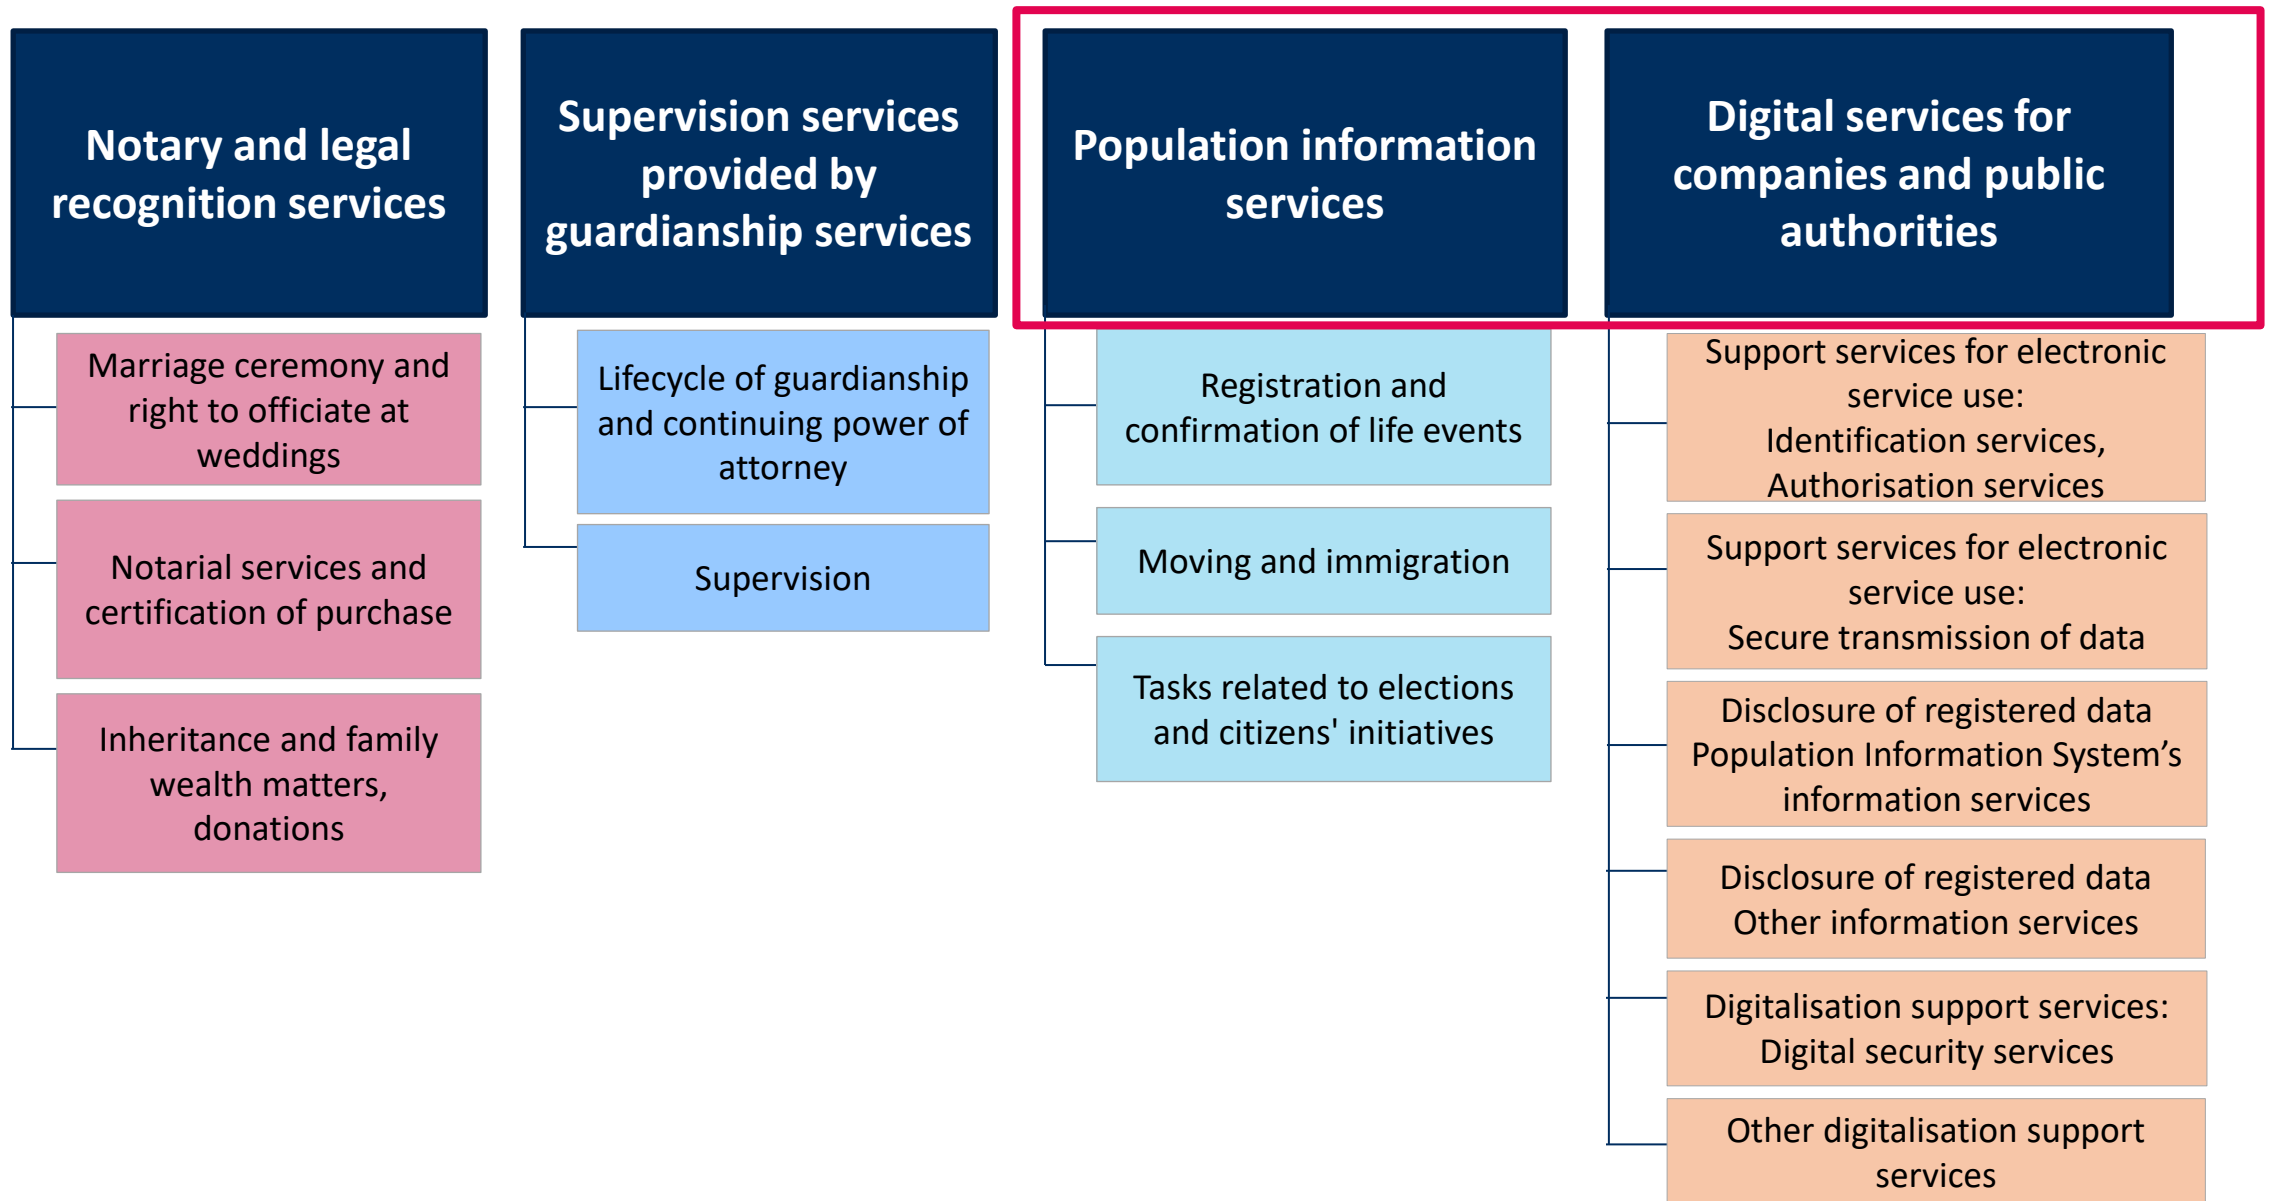

## The worksite of digital gaps

The worksite of digital gaps is an administration-oriented society where services are created through co-operation between actors

# Digital and Population Data Services Agency's services

# Population of Finland

(2.11.2022)

<https://dvv.fi>

# Worlds happiest country since 2018

(World Happiness Report 2022)

Digital Economy and Society Index, by Main Dimensions of the DESI

European Commission, Digital Scoreboard

Digital Economy and Society Index 2022

# Digital services available widely in the whole society:

Government agencies, municipalities, third sector, private companies.

# Population Register established in 1971

*Population Register Centre in 1969*

# Population information system

- The national population register (Population Information System) contains **vital records and address information of Finnish citizens and resident aliens.**
- Besides information on persons, the system contains **data on buildings and apartments.**
- Data from the central population register is **shared with authorities, businesses and citizens** (within limits set by law in detail)
- The system is **an essential part of the national information infrastructure**, providing one of the “basic building blocks” for the implementation of various digital services
- Enables **reliable compilation of voter lists for elections and fully automated censuses.**

# Population register system reform 2023 >

...and digital identity!

# Reform contents

- From 2023:
  - Registration to be made available for wider scope of foreign nationals
  - Digital on-boarding to population register (e.g. from abroad)
  - New "century signs" in the ID code
  - New information on source of personal data registered
    - Passport or no ID papers, digital or face-to-face identification
- From 2027:
  - Gender neutral ID codes issued
    - Gender-neutrality only partial, since current ID codes are not changed
- This will form the basis for the new Finnish e-ID!

1

## Digital ID

Digital identity document to be used in both online and offline services.

2

## eID for foreigners

Mobile application for foreigners that need to use digital services in Finland.

3

## Code Display

Alternative eID solution for persons not using a mobile device.

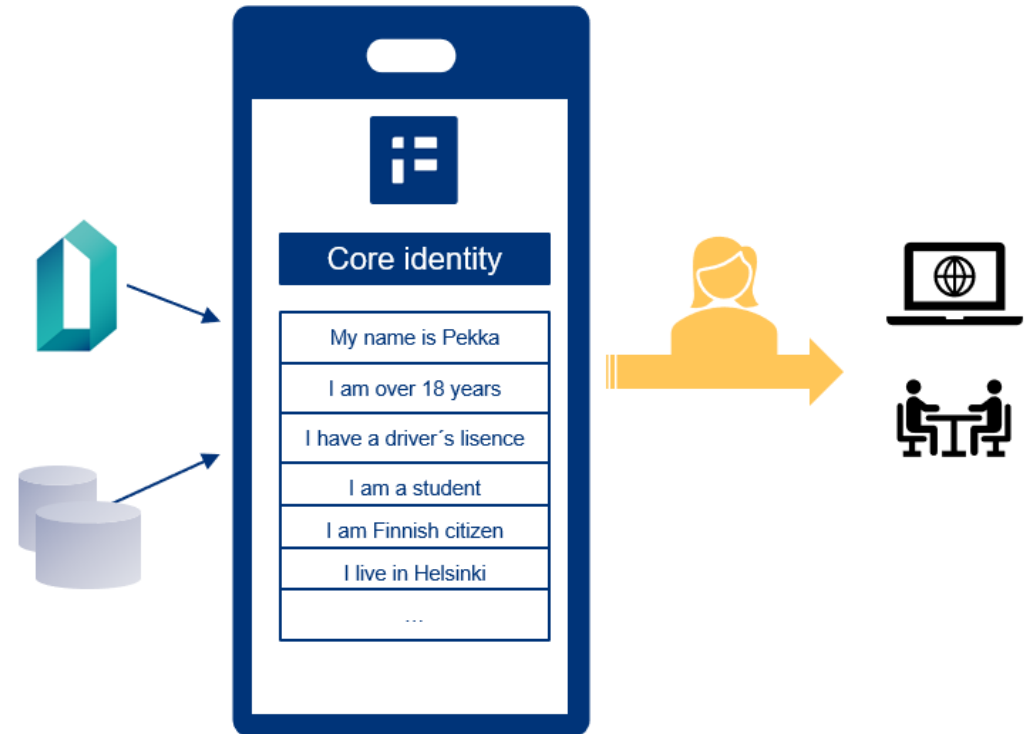

# Goal: Digital wallet for information certified by government agencies

**Expand** the set of personal data certified by the government agencies that can be transmitted to the other party during use of the services.

**Secure** the forming and development of self-sovereign identity solutions based on a core identity certified by the state.

## Digital Identity (launching in 2023)

# Example: automated certificates from Population Register 1/9

Digital and Population Data Services Agency

## Extracts and certificates from the Population Information System

SERVICE • NATIONWIDE • PUBLIC SERVICE

For an acceptable purpose, you can order certificates containing personal data stored in the Population Information System.

If you have been asked to provide an extract from the population register, it might refer to a life certificate or report on family relationships. The content of the certificate depends on the purpose of use. Always ask the person requesting the certificate what information it should contain.

You can order standard certificates for yourself and your dependants, i.e. a certificate of life, a residence certificate and a birth certificate. You can also order a marriage certificate and a marital status certificate for yourself.

If you need details of family relationships, for example, for your certificate or if you order a certificate for another person, you can order a free-form certificate. For a free-form certificate, you can select more extensive information.

You can also order an EU translation form or an Apostille for the certificate.

You can order certificates in Finnish, Swedish or English. You can also order certificates in Spanish, Italian, French or German.

### Petition for appeal or complaints

**Certificates from the Population Information System**

Identification

Ordering a certificate    Additional information

## Certificates from the Population Information System

In this service, you can order certificates issued by the Digital and Population Data Services Agency. To order, you must identify yourself using your online banking codes or Mobile ID. The certificates are subject to a fee and the payment is made as an online payment in connection with the order.

[I need an extract from the population register \(virkatodistus\), what should I order?](#)

### Certificates to Finland

If you order a certificate for a Finnish actor, you will receive the certificate as an electronic PDF document. No signature will be added to the document, and you cannot add a translation form or an Apostille certificate to it later.

You can download the certificate as soon as you have made the payment. The certificate can also be delivered to Suomi.fi Messages. If you do not use Suomi.fi Messages yet, you can enable it when you order the certificate. Certificates will not be delivered by post or, for data protection reasons, by email.

### Certificates sent abroad

If you order certificates for a foreign authority or for some other foreign actor, they will be posted to your home address because certificates

Digital self-service.

# Example: automated certificates from Population Register 3/9

Open the certificate and start the order:

☒ Birth certificate

You can use your birth certificate to give proof of your official date of birth. You may need this certificate, for example, when moving abroad and registering as a resident of another country. Schools and kindergartens in other countries may also require a birth certificate. You can order at the same time a particular certificate both for yourself and your dependants. You get a separate certificate for each individual.

The certificate includes the following information:

Name, former names, date of birth, municipality of residence at birth, country of birth, sex, citizenship and municipality of residence. The certificate also includes your parents' names, dates of birth, municipalities of birth, countries of birth and nationalities. If you were born before 1953, your parents' personal data might not be in the population information system and cannot be included in the certificate.

You can also choose to include your personal identity code on the certificate. Parents' personal identity codes will not appear on the certificate.

## Ordering a certificate

You can order a certificate after identification.

## WHAT TO DO

# Guardianship or continuing power of attorney

## When is guardianship needed? Are you preparing a continuing power of attorney for yourself?

In this guide, you can find answers to such questions as what is meant by guardianship, when is a guardian needed and what is meant by continuing power of attorney.

First select the person whose affairs you wish to manage. By answering the questions below, you get the right instructions and services for your situation.

Whose affairs would you like to manage?

- ☐ An adult close to me
- ☐ Myself (I want to be prepared for the future)
- ☐ My child who is under 18

## Wizards and services.

### Becoming a carer and the everyday life of an informal carer

This guide answers questions such as who can be an informal carer, what informal care support includes, what the informal carer's tasks are and how informal care can end.

When you answer the preliminary questions below, you will see the appropriate instructions and services for your situation:

Is your loved one in need of care?

- ☐ A minor
- ☐ An adult

What is your own situation?

- ☐ A pensioner
- ☐ A student
- ☐ Employed (part-time or full-time)
- ☐ Unemployed jobseeker (I receive unemployment benefits)
- ☐ Outside working life (I do not receive unemployment benefits)

Choose the hometown of your loved one

Enter municipality's name

#### The effect of carer's allowance on unemployment benefits

You can enter into an informal care agreement even if you are registered as a jobseeker at the TE Office. You must notify the TE Office of your informal carer status as soon as you become one.

Your entitlement to unemployment benefits depends on the employment nature of your informal care role. The TE Office will assess whether you can accept full-time work as an informal carer. If you are tied to full-time or 24-hour care, it is usually not possible to accept full-time work. In this case, you are also not entitled to unemployment benefit.

If you enter into an informal care agreement as an unemployed jobseeker, you may be entitled to an unemployment benefit for four months. After four months, the TE Office

# Guardianship

SERVICE · SIPOO · PUBLIC SERVICE

The appointment of a guardian is a last resort option to organize the management of a client's affairs. Therefore, the appointment of a guardian will require there is no other way to ensure that the affairs of the person in need of help are managed in an appropriate manner.

The Digital and Population Data Services Agency is the guardianship authority, and as such determines a person's need for guardianship and, where necessary, appoints a guardian or submits an application to the courts.

## Duties of the Guardian

The guardian protects the client's interests and represents them in matters that have been entrusted to the guardian. A guardian is most often appointed to manage their client's financial affairs and property. Furthermore, the guardian must always see to it that the client receives suitable care, treatment and rehabilitation. A guardian can also be appointed to an individual task, such as the sale of an apartment or property on behalf of their client. It is also possible that the guardian is appointed to represent the client in matters related to health care or treatment of illness, but this is not common.

## Komponenttien käyttöohje

Suomi.fi Design System tarjoaa kokoelman saavutettavia, uudelleenkäytettäviä ja dokumentoituja käyttöliittymäkomponentteja. Komponentit on toteutettu Suomi.fi-identiteetin mukaisina React-komponentteina.

Komponenttikirjasto tarjoaa kaikki komponentit samasta npm-moduulista. Kirjaston tekninen ohjeistus ja käyttöönotto löytyy GitHub-dokumentaatiosta.

[GitHub](#)

## Komponenttien käyttö

[Example](#)

Kirjastosta voi valita käyttöön haluamiaan komponentteja. Komponentit ovat avointa lähdekoodia.

[Koodiesimerkki \(React\)](#)

Shared design system for all services.

Reference Data

LOG INEN

FRONT PAGE

The Reference Data tool is a technical platform for collecting and sharing common public sector code lists and reference data. The code lists and their language versions are up-to-date, reliable, browsable to everyone beyond sector limits and downloadable to one's own use. Using common code lists enables interoperability in statistics and between IT systems.

Terminologies

LOG INEN

FRONT PAGE

Terminologies tool is used to collect, maintain and publish common terminologies of public administration. Data modelers may use the tool to define terms and relations. Terms, their definitions and even visualization of relations between the terms are publicly available for everyone interested.

Data Vocabularies

LOG INEN

FRONT PAGE

The Data Vocabularies Tool is a service for managing and publishing core component libraries and application profiles as linked data models. Core components are data specifications for harmonizing information used jointly by different actors. Application profiles reuse the existing core components and international linked data recommendations for describing semantics of the information structures to support interoperability of information systems.

3Dkunta - koneluettava kaupunkimalli (fi)

Application profile

Draft

Ministry of the Environment

Built environment

3Dkunta-projektissa (www.3dkunta.fi) on ajanjaksolla 09/2018 - 06/2019 määritelty vakioitu kuntien tuottama kaupunkimallin koneluettava muoto. Määrittely pohjautuu kansainväliseen CityGML-formaattiin. Määrittelyt on siirretty sellaisenaan Yhteentoimivuusallalle. Työstä on vastannut Nosto Consulting Oy (www.nostoconsulting.fi) ympäristöministeriön tilauksesta. (fi)
